

Shu Roo

Description:

ShuRoo creates a high frequency "Safety Sound Zone" 400 metres ahead and 50 metres either side of your vehicle which alerts kangaroos and other wildlife of your approaching vehicle "day, night, rain or shine. ShuRoo's unique signal cannot be heard by humans, but to wildlife it is as loud as a police siren. By taking advantage of their high frequency danger alert system in this way, ShuRoo warns animals of your approach and helps prevent a collision that could potentially harm you, your passengers and your vehicle. Not only does ShuRoo help protect you and your family, it also protects our wildlife.
